

RESEARCH CENTRE
UNIVERSITY OF ŽILINA

We are a team of researchers who believe that the research on which we work every day, sooner or later improve the quality of our life and life of people around us.

Research Centre is a new established entity of University of Žilina with aim to conduct first class research in:

transport infrastructure
progressive materials
smart buildings and renewable
energy resources.

The University of Žilina - one of the most significant educational institutions in the central European region has a long tradition going back to 1953 with main focus on technical studies and research in various fields of transport (materials; mechanical, electrical and civil engineering; management and operation).

UNIVERSITY IN NUMBERS

- 7 faculties
- 121 study programmes in both- full-time and part-time forms
