Contribution to the project

Role in the project (coordinator, work package leader, task leader or participant):

Work package leader or participant, depending on the structure of the project.

The Belgian federal police intend to use new technologies for the public order management and protection as special support unit. Therefore our aim is to help and guide the process of the development of new technologies. In that way, the Belgian Federal Police tries to guarantee a certain level of public service towards the community in all circumstances.

The Belgian Federal Police uses the concept of negotiated management of the public space which envisage the de-escalation of mass-gatherings. Besides, the Belgian Federal Police also has a huge experience in the field of the management of public order during European summits. Therefore the Belgian federal police believes it can be a reliable partner to help conceptualize the scope of this project call and is willing to test and demonstrate the developed products.

Looking for (existing consortium, partners with specific expertise, etc.):

Looking for an existing consortium in which we can carry out the above-mentioned as end user.

Contribution to the project (expertise, human resources, testing, lab facilities, etc):

- **Expertise**
 - **Human resources**
 - **Testing**
-

Previous experience

- Huge experience in the field of the management of **public order during European summits**.
