| Partner search deadline | July 31 st , 2016 |
| PROJECT DESCRIPTION | <p>Proposal Outline:</p> <p>Marie Skłodowska-Curie Individual Fellowships in cardiovascular disease epidemiology</p> <p>The Research Center on Epidemiology and Preventive Medicine (EPIMED; http://epimed.uninsubria.eu) at the University of Insubria in Varese (Italy) is looking for a talented postdoc/scientist in the field of cardiovascular disease epidemiology in the framework of the MSCA-IF-2016 program.</p> <p>Research topic</p> <p>The EPIMED center is mainly active in population-based cohort studies with specific focus on risk prediction models, social inequalities in disease and risk factors, circulating biomarkers, and genetics of cardiovascular diseases. Depending on the background and interest of the candidate, projects can be designed jointly by the applicant and the members of the group in any of these lines. Data availability includes long-lasting cohort studies and a just-finished cross-sectional screening with detailed diet and lifestyle information. The EPIMED is involved also in several European consortia, providing access to large epidemiological databases.</p> <p>Personal requirements/qualifications</p> <p>The MSCA-IF program supports experienced researchers for a full time period between 12 and 24 months. Personal requirements/qualifications include:</p> <ul style="list-style-type: none">- Fulfillment of the eligibility criteria as in the guide for applicants for the MSCA-IF program;- Eligible researchers can be of any nationality and must not have resided or carried out their main activity in Italy for more than 12 months since September 2013;- PhD degree or at least 4 years of research experience (full-time equivalent) in epidemiology, medicine, biostatistics or related fields;- Previous experience in the cardiovascular epidemiology field and a strong publication record is an asset- Independence and creative thinking- Fluency in English, willingness to learn Italian |
